

Plants & Soil

All figure numbers and pages from *Geography Now*.

What are the five main **vegetation regions of Canada** and where are they located? (pp.39-40)

Vegetation Region	Location in Canada
Temperate Rain Forest	Pacific Coast

Soil is made up of four main components. (*“MOMA” might help you remember this for later!*)

- Minerals
- Organic Material
- Moisture
- Air

There are five main layers to soil (O, A, B, C, and D). Using Figure 5.5 on page 42, briefly explain what each layer is made up of in the space below.

- O
 -
 -
- A
 -
 -
- B
 -
 -
- C
 -
 -
- D
